Profile Summary

Passionate and detail-oriented Full Stack Developer experienced in building scalable and maintainable web applications using Next.js, MERN, and Django. Proven ability to deliver performant and secure software with clean, optimized code. Solved 200+ LeetCode problems, showcasing strong problem-solving and algorithmic thinking. Seeking an opportunity to contribute and learn in a collaborative tech environment.

Technical Skills

Languages: Python, JavaScript
Frameworks & Libraries: Next.js, React, Node.js, Express.js, Django
Databases: PostgreSQL, MongoDB, Redis
ORM / Tools: Prisma, Mongoose
Other: REST APIs, WebRTC, Git/GitHub, Docker

Projects

School ERP System — Next.js, PostgreSQL, Prisma
Built a complete ERP platform for managing student data, attendance, and fee payments. Deployed successfully in three schools; running profitably. Implemented role-based authentication and optimized queries for 40% faster performance.
Live Demo ¦ GitHub

Chess Game — Vanilla JavaScript, HTML, CSS
Developed a fully functional chess game with move validation and dynamic highlights. Designed modular architecture for scalability and clean logic separation.
Live Demo ¦ GitHub

Frontend Projects
• AD Agency Website — React + Tailwind
Live ¦ GitHub
• Grey Portfolio — Vanilla JS + GSAP
Live ¦ GitHub
• Flowers Website — JS + CSS
Live ¦ GitHub

Education

B.Tech in Computer Science & Engineering
Dr. A.P.J. Abdul Kalam Technical University (AKTU) ¦ 2023 – 2027

Achievements

• Solved 200+ LeetCode problems focused on DSA and algorithms.
• Built and deployed multiple full-stack apps used by real clients.
• Managed freelance projects since class 9, including a profitable SaaS product.
